THE MUSIC

ShairPort

By [James Laird](#) (announcement)

What it is

This program emulates an AirPort Express for the purpose of streaming music from iTunes and compatible iPods and iPhones. It implements a server for the Apple RAOP protocol. ShairPort does not support AirPlay v2 (video and photo streaming).

Build Requirements

Required:

- OpenSSL

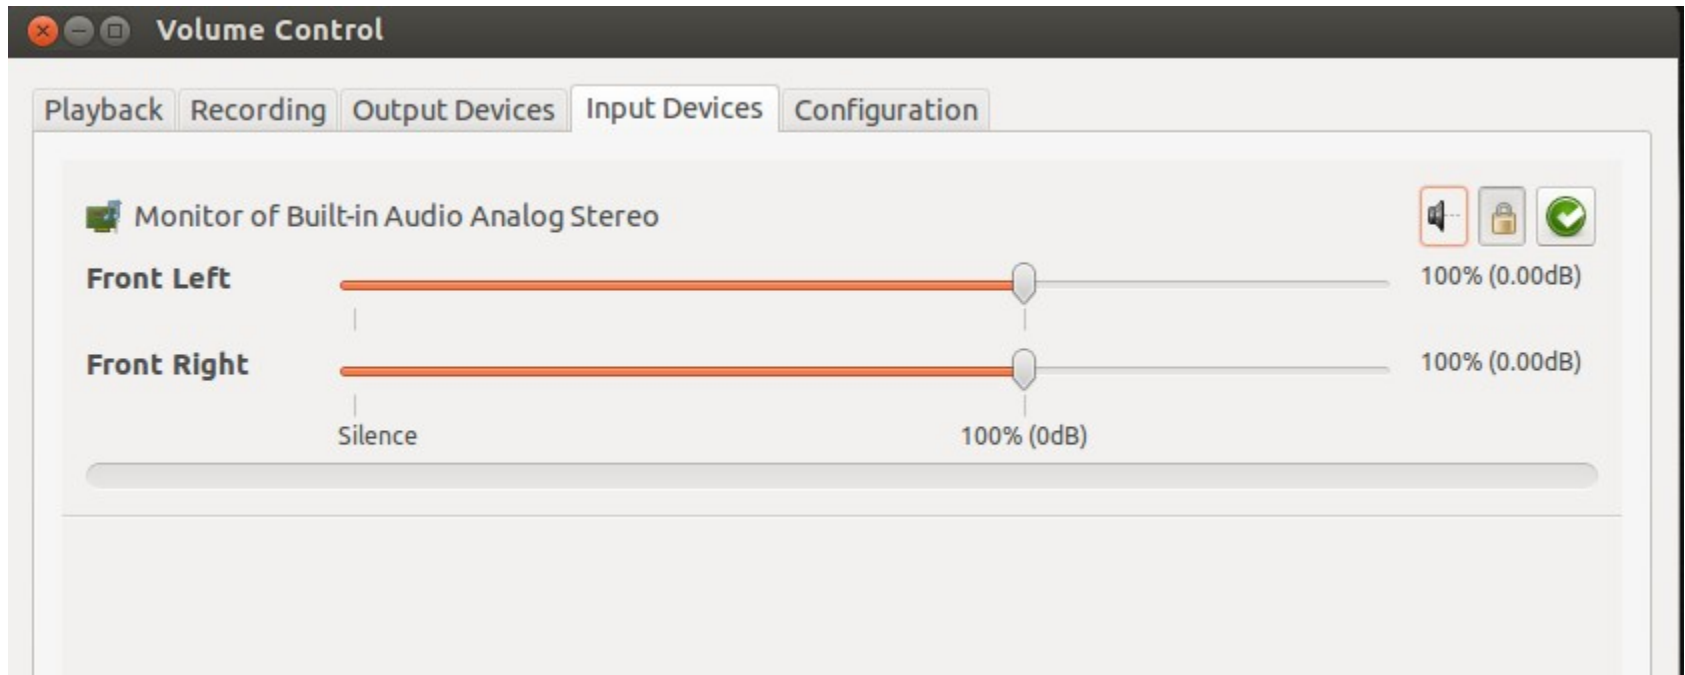

Optionally:

- libao
- PulseAudio
- avahi

Debian/Raspbian users can get the basics with

```
apt-get install libssl-dev libavahi-client-dev libasound2-dev
```

THE INPUT

THE MIXER

```
rspectre@recipeforhate:~$ ffmpeg -f v4l2 -input_format yuyv422 -s 1280x720 -i /dev/video1 -f pulse -i alsa_output.pci-0000_00_1b.0.analog-stereo.monitor -f pulse -i alsa_input.usb-Blue_Microphones_Yeti_Stereo_Microphone-00-Microphone.analog-stereo -f pulse -i alsa_input.usb-046d_0821_75A0DA2D00-U0x46d0x821.analog-stereo -filter_complex amerge=inputs=3 -vcodec libx264 -b:v 2000k -acodec libfaac -ac 2 -ab 128k -ar 22050 -preset medium -pix_fmt yuv420p -g 20 -f flv "rtmp://1.16871594.fme.ustream.tv/ustreamVideo"
```
